Digium® and Telrex Announce Partnership and Interoperability Certification

CallRex Professional™ Call Recording Software Certified on Asterisk Business Edition™, Offering Affordable Call Center Optimization Solution

HUNTSVILLE, Ala., and KIRKLAND, Wash., September 30, 2008 — Digium®, Inc., the Asterisk® Company, and Telrex, provider of the award-winning CallRex™ suite of IP call recording and call center optimization solutions, today announced that the CallRex Professional™ call recording and monitoring solution has earned the designation of "Digium|Asterisk Certified" for Asterisk Business Edition™. CallRex software from Telrex, an affordable, robust call recording software for Asterisk installations, was thoroughly tested in Digium's lab to validate its interoperability with Asterisk Business Edition. Telrex is a Digium Interoperability Partner.

Digium is the creator and driving force behind Asterisk, the open source voice communications software deployed by more than 4 million servers worldwide to manage VoIP calls for businesses and individuals. More resellers, telecom professionals and software developers choose Digium's products than those of any other open source telephony company because only Digium delivers the technical superiority, security and flexibility associated with Asterisk. Asterisk powers Digium's family of software and hardware appliances including AsteriskNOW™, Asterisk Business Edition™ and Switchvox™.

"Telrex is pleased to support the Asterisk open source telephony community with affordable and robust call recording solutions," said Robert Kapela, president of Telrex. "Companies and call centers of all sizes can reap the benefits of call recording and monitoring software, allowing them to limit legal liability, improve customer satisfaction and employee productivity, and enhance security."

Telrex offers affordable call recording and monitoring solutions for small- to medium-sized businesses. Flexible, monthly "pay-as-you-grow" subscription pricing is available from Telrex so that companies can simply pay a monthly fee for the number of users being recorded.

"The addition of CallRex call recording software to the Digium partner ecosystem will benefit small and medium-sized businesses that need to supplement their Asterisk installations with a stand-alone call recording system," said Jim Webster, director of technology partnerships for Digium. "We are pleased to work with Telrex to offer complementary telephony software solutions that will help our customers."

About Telrex

Telrex provides IP call recording and call center optimization software. CallRex supports IP telephony systems, VoIP softswitches and unified communications solutions from Digium, 3Com, Mitel, Inter-Tel, Cisco, Avaya, Microsoft OCS, ShoreTel, BroadSoft, Sylantro, Genband, Vertical, Pingtel, Fonality, TalkSwitch, and more. CallRex API enables custom integration of the CallRex platform with business and communications applications. Telrex offers its award-winning CallRex suite of software through value added resellers worldwide. Learn more at www.telrex.com or call +1.425.827.6156 x2.

About Digium

Digium®, Inc., the Asterisk® Company, created, owns and is the innovative force behind Asterisk, the most widely used open source telephony software. Since its founding in 1999, Digium has become the open source alternative to proprietary communication providers, with offerings that cost as much as 80 percent less. Digium makes Asterisk software available to the open source community and delivers Asterisk Business Edition and Switchvox IP PBX software to power a broad family of products for small, medium and large businesses. The company's product line includes a wide range of hardware to enable resellers and customers to implement turnkey solutions or to design their own voice over IP (VoIP) systems. More information is available at www.digium.com.
