Digium® and Dialogic Corporation Announce Partnership and Interoperability Certification Plans

**Dialogic® 1000 Media Gateway Series and Dialogic® 2000 Media Gateway Series to be Validated for
Interoperability with Digium's Asterisk Business Edition™**

HUNTSVILLE, Ala., and PARSIPPANY, N.J., February 3, 2009 — Digium®, Inc., the Asterisk® Company, and Dialogic Corporation ("Dialogic"), a global provider of world-class products and technologies for media and signal processing, today announced that Dialogic is an official member of the Digium Partner program and will soon become an Interoperability Partner. These represent the first steps in certifying the Dialogic® 1000 and 2000 Media Gateway Series for use by the Asterisk community.

Digium's Interoperability Partners have products that are complementary to and interface with Asterisk. These products interact with Asterisk through a standards-based interface (such as SIP) and will be certified by Digium for interoperability with Asterisk Business Edition™.

Digium is the creator and driving force behind Asterisk, the open source voice communications software deployed by millions of servers worldwide to manage VoIP calls for businesses and individuals. More resellers, telecom professionals and software developers choose Digium's products than those of any other open source telephony company because only Digium delivers the technical superiority, security and flexibility associated with Asterisk. Asterisk powers Digium's family of

software and hardware appliances including AsteriskNOW™, Asterisk Business Edition™ and Switchvox™.

"Being certified as a Digium Interoperability Partner promotes further choice for the Open Source telecommunications community," said Jim Machi, senior vice president of marketing at Dialogic. "Dialogic has been a communications pioneer since the early 1980's and this has enabled our customers to create truly innovative communications solutions during the past 25 years. We expect this relationship to benefit joint customers in similar ways going forward."

"Having worked with Dialogic previously, Digium recognizes that Dialogic has a significant customer base for enterprise and carrier applications," said Jim Webster, Digium's director of technology partnerships. "We believe that certifying Dialogic media gateway products with Asterisk Business Edition will provide our joint customers with additional options that will promote Asterisk and benefit both companies."

Dialogic encourages all users of its products to procure all necessary intellectual property licenses required to implement their concepts or applications, which licenses may vary from country to country.

About Digium

Digium®, Inc., the Asterisk® Company, created, owns and is the innovative force behind Asterisk, the most widely used open source telephony software. Since its founding in 1999, Digium has become the open source alternative to proprietary communication providers, with offerings that cost as much as 80 percent less. Digium makes Asterisk software available to the open source community and delivers Asterisk Business Edition and Switchvox IP PBX software to power a broad family of products for small, medium and large businesses. The company's product line includes a wide range of hardware to enable resellers and customers to implement turnkey solutions or to design their own voice over IP (VoIP) systems. More information is available at www.digium.com.
