

Welcome to your new Digium Switchvox and Polycom phone system. This guide will help you become familiar with using your new phone and phone system. These instructions assume you are using a Polycom IP 450 telephone. If you're using a different Polycom phone, the instructions should be similar, or ask your system administrator for help.

There are online tools that can make things even easier. Ask your system administrator for the URL to access your extension's web interface. It should be something like <http://192.168.0.7/>

Getting Started

Start by logging in to your Voicemail and recording your mailbox greeting. To do this, press the "Messages" button on your phone, log in with your password followed by the pound key when prompted, then press "0" for advanced options, and then press "1" to record your Unavailable Message.

Making and Receiving Calls

- Answer incoming calls with handset or headset (press the speaker button for speakerphone)
- To place a call dial 9 + 7-digit local number, or 11-digit long distance number. If the call does not dial automatically, press Send to place the call.

Main Menu

- 1 - New Messages
- 2 - Change Folders (i.e. old messages, saved messages)
- 3 - Advanced Options (operates on current message):
 - 1 Reply to Voicemail (only available when leaving or receiving messages on internal extensions)
 - 3 Hear Message Envelope (date/time, caller id of message)
 - * Return to the Main Menu
- 0 - Mailbox Options:
 - 1 Record Unavailable Message
 - 2 Record Busy Message
 - 3 Record Your Name
 - * Return to the Main Menu

The following options are only available when actually listening to your messages:

- 4 - Previous Message
- 5 - Repeat the Current Message
- 6 - Next Message
- 7 - Delete/Undelete the Current Message
- 8 - Forward Message to another User
- 9 - Save to another Folder
